

[Between the Lines]

THE POWER BEHIND YOUR POWER

BY REG RUDOLPH || GENERAL MANAGER

As April arrives, it brings with it the showers that produce spring flowers. It also heralds the beginning of a potentially stormy season that can inherently include power outages. While San Isabel Electric Association strives to provide reliable electricity to members, there are times when Mother Nature has other plans. Most of us can ride out a storm from the comfort and convenience of our homes. However, there is a group of professionals that spring into action when the weather takes a turn for the worst — co-op lineworkers.

Braving stormy weather and other challenging conditions, lineworkers often must climb 40 or more feet in the air, carrying heavy equipment, to restore power. Listed as having one of the 10 most dangerous jobs in the United States, lineworkers must perform detailed tasks next to high-voltage power lines. To help keep them safe, lineworkers wear specialized protective clothing and equipment at all times when on the job. This includes special fire-resistant clothing that will self-extinguish, limiting potential injuries from burns and sparks. Insulated and rubber gloves are worn in tandem to protect them from electrical shock. While the gear performs a critical function, it also adds additional weight and bulk, making the job more complex.

In addition to the highly visible tasks lineworkers perform, their job today goes far beyond climbing to the top of a pole to repair

Reg Rudolph

a wire. They are also information experts who can pinpoint an outage from miles away and restore power remotely. Line crews use their laptops and cell phones to map outages, take pictures of the work they completed and troubleshoot problems. In our community, San Isabel Electric lineworkers are responsible for keeping 4,606.61 miles of lines across seven counties working in order to bring power to your home and our local

community 24/7, regardless of the weather, holidays or personal considerations.

While some of the tools that lineworkers use have changed over the years, namely the use of technology, the dedication to the job has not. Being a lineworker is not a glamorous profession. At its essence, it is inherently dangerous, requiring work near high-voltage lines in the worst of conditions, at all times of the day or night. During hurricanes, wildfires or storms, crews often work around the clock to restore power. While April is known for spring showers, there is also a day set aside to “thank a lineworker.”

Lineworker Appreciation Day is April 9. So during the month of April, if you see a lineworker, please pause to say thank you to the power behind your power. Let them know you appreciate the hard work they do to keep the lights on, regardless of the conditions.

Lineworker Appreciation Day
April 9, 2018

Dear San Isabel Electric Association Member:
 In accordance with the bylaws, San Isabel Electric Association is publishing a list of Members whose capital credits checks, issued in 2017 for partial 1988, 1989 and 2016 allocation, remain unclaimed. If your name is on this list, please contact the office at 719-547-2160 and ask for the Capital Credits department. You may also contact SIEA by email at capitalcredits@siea.com. You may be required to provide proof of identity before claiming capital credits. The following list is for amounts of \$10 or more. You may also view the complete SIEA list on the website, www.siea.com.

Sincerely,

Reg Rudolph, General Manager
