

# WATER + POWER DON'T MIX

---

## JUST REMEMBER:

- Keep electrical devices and cords at least 10 feet away from pools, spas, slip-n-slides and wet grass.
- Don't touch anything electrical when you are wet.
- Avoid touching electrical devices, cords and outlets when you are sweaty. Perspiration can conduct electricity.
- Don't squirt your super soaker or toss water balloons at power lines.
- Keep small appliances in your bathroom unplugged and put away if you are not using.
- If someone mixes water and electricity, call 911 and stay 10 feet away or more.
